

Labels

Labels screen or digitally printed including **sequential numbering** and **QR coding**.

Digital labels are self-adhesive labels printed on either wide format or flatbed digital printers in almost any size or shape.

For labels requiring a specific print finish we will recommend high definition screen printing with exact colour matching if it is considered more suitable.

We'll match to Pantone, Ral or an existing sample or product if required.

Polycrown manufactures industry specific labels such as asset and security labels with options including barcoding and serialising plus over-lamination for added print protection.

**Wide Format Label
Printing**

Process offers high-resolution full colour labels with minimal set up and repeat costs - perfect solution for low and medium volume.
